DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Kiyohara.

Note, that while the reference numbers in this rejection remain the same, the rejection is now based on the embodiment shown in Figure 8 of Kiyohara.

With respect to claims 1, 5, and 13, Kiyohara discloses the claimed apparatus and method including a paper guide 3, a biasing member 52. Figure 8 of Kiyohara shows the paper 47 being fed between the guide 3 and the spring 52 as the spring 52 presses the paper 47 against the guide

3. The printhead 48 extends past the paper guide 3 at its top end as shown in Figure 8.

With further respect to claim 5, the bottom edge of printhead 48 (as shown in Figure 8 of Kiyohara) is positioned over the point where spring 52 contacts paper guide 3.

With respect to claims 2 and 6, guide 3 is a roller mounted perpendicular to the paper path and can rotate on an axis 2.

With respect to claims 3 and 7, spring 52 appears to be structurally identical to the spring shown in applicant's Figure 1. Therefore, it appears that Kiyohara discloses a pinch spring.

With respect to claims 4 and 8, spring 52 has a second end shown in Figure 5 of Kiyohara and must have another end supported by the image forming system at some point since the spring

cannot float by itself. The spring is shown aligned with the path of paper 47 in Figure 8 of Kiyohara.

With respect to claim 13, all the positively recited method steps are carried out by the structure mentioned in the above prior art rejection of claims 1 and 5. Kiyohara further discloses locating a printing device 48 proximate the biasing member 52 as shown in Figure 8 of Kiyohara.

Response to Arguments

3. Applicant's arguments filed 7/28/02 have been fully considered but they are not persuasive of any error in the new grounds of rejection.

The new grounds of rejection based on Figure 8 of Kiyohara meet the structure recited in the amended claims.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2854

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
